DETAILED ACTION

Allowable Subject Matter

Claims 1 – 20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach an improved process for providing user controlled abstracted television programming information comprising the steps of extracting edit information from a plurality of produced alternate edited versions of a television program information, transmitting the edit information as auxiliary information, combining the auxiliary information with the programming information and displaying, under control of user selection information and auxiliary information, a subset of the television programming information.

The prior art reference to Kawamura et al (US 2002/0126991) discloses producing alternate versions of a video program. Kawamura fails to teach extracting edit information, as the versions have already been produced, transmitting the edit information as auxiliary information, combining the auxiliary information with the programming information and displaying a subset of the television programming information. It is noted that although Kawamura teaches producing table of contents or edit information for producing a desired sequence of video frames, the table of contents are not extracted, transmitted and combined with the program information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haberman et al (US 2002/0013943) – personal messages which are broadcast

Goldschmidt et al (US 6,594,825) – program versions based on user preferences

Okura et al (US 6,487,722) – EPG transmitting apparatus and method

Banks (US 6,139,197) – Multiple versions of image snapshots

De Lang (6,020,912) – Video-on-demand system

Mattis et al (US 6,289,358) – Alternate versions of objects
